SUMMARY

Applied AI Engineer with production experience building autonomous AI agents, RAG pipelines, and scalable applications across healthcare, retail, and local businesses. Shipped end-to-end products — from complex Flutter apps to AI-powered SaaS platforms — that integrate directly into business workflows to eliminate manual operations. Combines deep AI/ML expertise (LLMs, computer vision, NLP, agentic systems) with full-stack development to deliver commercial tech products that drive operational efficiency. Founder of Mokn, an AI agency serving Saudi SMBs with production-grade automation systems.

PROFESSIONAL EXPERIENCE

Founder & AI/Software Engineer | Mokn | Saudi Arabia

Late 2025 – Present

- Architected and deployed an autonomous AI booking agent for medical clinics — handling scheduling, rescheduling, cancellations, and conflict detection — entirely automating front-desk workflows via FastAPI, Firebase Auth, RBAC, Gemini API orchestration, and WhatsApp Business API webhooks running 24/7
- Built a SaaS review management system for cafes: automated feedback collection intercepts negative reviews before Google Maps, routing them to a private WhatsApp recovery flow via Evolution API and n8n automation workflows
- Designed multi-step agent pipelines using LangGraph and Pydantic v2, orchestrating webhook pipelines and background agent workers; deployed all systems with Docker on Google Cloud and Heroku
- Implemented Firebase Authentication, RBAC, and multi-tenant data isolation across all client-facing applications

Freelance AI/ML & Software Developer | Self-employed | Saudi Arabia

2024 – Present

- Developed DermAI end-to-end: trained and deployed a TensorFlow/Keras skin condition classifier connected to a FastAPI backend and Flutter mobile app — full AI model → backend service → client application integration
- Architected a large-scale Flutter application (50+ screens) with Riverpod, GoRouter, Firebase Auth, and 3-tier RBAC for a financial services client; integrated Google Maps API and Dialogflow across client projects
- Commercialized a web-based customer loyalty platform with REST API integrations and cloud infrastructure for local businesses

AI & Robotics Engineering Intern | Summer Internship | Jeddah

Jul – Aug 2023

- Contributed to ROS robotic arm automation — data preprocessing, AI/NLP tools, system integration in a collaborative engineering environment

KEY PROJECTS

MeshSense — Industrial Predictive Maintenance — Python · Scikit-learn · PostgreSQL · WebSocket · IsolationForest · Autoencoder

- Swarm of mobile sensor agents with real-time anomaly detection, PostgreSQL-backed pipelines, and AST-enforced clean architecture boundaries

Mokn Academic — Multi-Agent Arabic AI Advisor — LangGraph · Gemini · Pydantic v2 · ChromaDB · FastAPI · WhatsApp API

- LangGraph cyclic negotiation between 3 specialized agents, Arabic RAG pipeline via ChromaDB + Sentence Transformers, SSE streaming frontend — 116 passing tests · Agenticthon 2026

Moustashfak — Multi-App Clinic Queue System — Flutter · Riverpod · GoRouter · Firebase · Cloud Functions

- Three-app monorepo (patient · staff · admin) with feature-based architecture, repository pattern, 3-tier RBAC, and real-time queue management

News Research RAG — LangChain · FAISS · Hugging Face Transformers · Streamlit

- Production RAG pipeline: URL extraction → chunking → FAISS vector indexing → local Hugging Face inference — grounded answers with citations, zero API key dependency

TECHNICAL SKILLS

AI / ML: LLMs · AI Agents · RAG · LangGraph · LangChain · Gemini API · ChromaDB · FAISS · PyTorch · TensorFlow · Scikit-learn · Hugging Face · Computer Vision · NLP · Pydantic v2

Automation: n8n · WhatsApp Business API · Evolution API · Webhooks · Dialogflow · Google Maps API · Workflow Orchestration

Backend & Cloud: Python · FastAPI · Flask · REST APIs · Firebase · PostgreSQL · Docker · Git · Google Cloud · Heroku · RBAC

Frontend & Data: Flutter · Next.js · TypeScript · React · Streamlit · Pandas · SQL · Tableau

EDUCATION

Bachelor of Science in Artificial Intelligence Engineering

Early 2025

Jeddah International College | GPA: 4.3 / 5.0 | Arabic (Native) · English (Fluent)
